*Julianna Annarella, Resident of California*

*I found this year's World Peace Pageant video presentation to be more realistic, i.e., showing dead and mutilated bodies; a car with remnants of the roiling mushroom cloud, and, of course, bombed buildings. You also presented families who suffered human loss, as well as people who survived and who have to deal with their on-going mental and physical pain.*

*There should be more of an outcry abolishing nuclear weapons by politicians and world leaders! Alas, I do not hear their voices!*

*I was pleased to see that young children are being informed about the perils of nuclear weapons and hopefully they will become strong advocates to end this evil. They must understand the inhumanity of nuclear weapons and seek to abolish nuclear weapons once and for all.*

*Sincerely,  
Julianna.*
