Thank you very much for your really big efforts to spread the message of a nuclear free world into the human society ! All the best for you and your friends!

----- **Carl-A. Fechner, Director of the 4th Revolution, Immendingen, Germany**

Peace is dear to the heart of every human being. It is with gratitude and hope that we start on the new "Road to Peace," so all men may live in harmony and love for each other.

----- **Patricia A. Casey, City of Laguna Woods, CA, U.S.A.**

"Mr. Kimura's message in his presentation, "The World Peace Pageant, 2013," is vital and over-powering. I feel privileged to partake in this most inspiring endeavor. May peace unfold in the spirit of love and harmony throughout the world."

----- **Julianna H. Annarella, City of Laguna Woods, CA, U.S.A.**

The story of Atomic bombs and nuclear disasters has been told. However for the survival and for the sake of future generations this story should and must be retold and retold. This documentary is an awakening for many of us who have never heard of or considered the huge nuclear arsenal of nuclear weapons stored by the U.S., Russia and other nations. Few of us have ever heard of the Clansti Green Nuclear Power plant in California and the reasons and decision to close it forever.

This documentary serves as a useful testimony to the citizens of the world of the imminent risks, impending disasters and inevitable annihilation of populations from nuclear wars and accidents. This documentary touches upon the aftermath of two atomic bombs and a string of nuclear accidents – The Three Mile nuclear plant in the U.S., the failure of the Mitsubishi built reactors in the Clansti Green Nuclear Plant in California, the Chernobyl melt-down in Russia, the explosion of a nuclear submarine in the Baltic Sea, and the USA General Motors built Nuclear reactor in Fukushima destroyed by a tsunami.

Which country will be the next victim?

This film should be shown in every school throughout the world. Seeing, is believing!

----- **Charles Rummel, Squamish, Canada**

Thanks for sharing the video. The interviews with the experts were informative, and the interviews with the victims of atomic warfare were moving. This video really helped open my eyes further to dangers of nuclear energy. The video also serves as a reminder as to how much we are at risk as long as we possess weapons seemingly designed to mass-murder people.

----- **Ross S. Heckmann, Los Angeles, U.S.A**
